DescriptionCurriculumFAQNoticeReviewsGrade

This interactive course aims to foster a deep understanding of environmental issues and inspire action towards sustainable living. It will delve into the interconnectedness of ecosystems, human activities, and their impact on the planet. The course content will cover a wide range of topics, including Climate Change: Exploring the causes, effects, and potential solutions to global warming, Biodiversity Loss: Understanding the importance of biological diversity and the threats it faces, Environmental Pollution: Examining different types of pollution (air, water, land) and their consequences, Sustainable Practices: Learning about eco-friendly habits and technologies that can help protect the environment, Environmental Policies: Discussing government regulations and international agreements aimed at addressing environmental challenges.

Course Objectives:

Knowledge Acquisition: Participants will gain a comprehensive understanding of environmental concepts, issues, and trends.

Critical Thinking: Students will develop the ability to analyze environmental problems, evaluate solutions, and make informed decisions.

Environmental Awareness: The course will cultivate a sense of responsibility and commitment to protecting the planet.

Sustainable Behavior: Participants will be encouraged to adopt sustainable practices in their daily lives.

Active Citizenship: Students will learn how to engage in environmental activism and contribute to positive change.
